

Vacancy: Filter Aligner—Temp to Perm

DEPARTMENT: Operations

LOCATION: Shipley, West Yorkshire

Teledyne Defence & Space are seeking key individuals to join the existing Test teams engaged in the production of advanced electronics systems and integrated end to end RF & microwave solutions for the defence, space and security markets.

The role will consist of RF component and module-level alignment, utilising standard laboratory equipment within the production environment, following procedures and specifications in accordance with the appropriate guidelines.

Main Responsibilities:

- Perform production and R&D alignment of RF and microwave components, such as multiplexers, RF Filters and passive components.
- Capable of tuning high-frequency RF circuits using small hand tools and equipment. Experienced with components (capacitors, coils, substrates) and attachment media (solders and epoxies).
- Familiar with the use of common laboratory equipment including Vector Network Analysers, Spectrum Analysers and oscilloscopes.
- Able to read and interpret work instructions, schematics and process procedures to determine sequence of operations and proper alignment techniques.
- Ability to test, troubleshoot and rework is desirable.

Key Attributes:

- Previous Filter tuning experience.
- Good hand to eye co-ordination.
- Ability to follow written, pictorial and verbal working instructions.
- Patience and an eye for detail.
- Ability to consistently produce high quality work.
- Must be adaptable and have the ability to multi-skill.

Desired skills:

- Previous experience within the Defence / Space Electronics Industry
- Previous Assembly experience for reworks.

How to apply:

To apply, please send your CV with a covering letter to: HR Department, Teledyne Defence & Space (a division of Teledyne Ltd), Airedale House, Acorn Park, Shipley, BD17 7SW - or via email: angela.stalker@Teledyne.com
