

Microwave Production Manager

REPORTING TO: Head of Operations

LOCATION: Teledyne Technologies - Firth Road, Lincoln

Teledyne Microwave Solutions UK are looking for a key individual to join their Microwave Business based at Firth Road in Lincoln. The successful candidate will be responsible for overseeing production for the Site, working closely with Supply Chain, Engineering and Project teams.

This is a manufacturing-leadership role and will oversee the day-to-day planning and organisation of production resource to meet agreed weekly output targets.

Main responsibilities for this role are:

- Manage the delivery of products to meet customer demand on time and in full whilst maximising the efficiencies and capacities of the production area
- Be responsible for the leadership, development and deployment of a motivated and high performing team
- To promote safe methods of working and make sure of employee safety at all times
- Ensure that the quality of our products and processes meets the needs of our customers
- Promote organisational alignment, best practice and drive continuous improvement initiatives and thinking
- Provide 'hands-on' support to production to meet shortfalls in capacity
- Support New Product Introduction activities to reduce cost and improve competitiveness
- Working closely with Supply Chain, Engineering and Project teams

The successful candidate will be able to satisfy the following requirements:

- Experience of operating in a Production supervisory role within a technical manufacturing environment in a complex, international and multi-cultural context
- A continuous improvement and process-oriented mind set
- Knowledge and application of standard production metrics to drive sustained business improvement
- Strong persuasive communication, influencing and negotiation skills (verbal and written)
- Autonomous working, used to adhering to tight deadlines and able to prioritise workload under pressure through risk management
- An understanding and experience of working within an ERP systems (preferably SAP) from a Manufacturing perspective
- Extensive knowledge of MS Excel and good working knowledge of other MS office products
- Experience of cost management
- Highly methodical with an ability to control and manage multiple tasks on a regular basis
- Highly motivated
- An appreciation of lean concepts
- Understanding of Supply Chain processes and systems
- Security clearance to SC level is desirable
